

Sole-Aero Hosted Pricing

Hosted Voice solutions use a technology called Voice Over IP (VOIP) to transmit your voice over the internet instead of using traditional telephone lines. Although relatively new to the market in the UK; businesses all over the world have been enjoying the benefits of Hosted Voice for years. Hosted Voice can reduce line rental costs and acts as a true replacement for traditional ISDN services. The flexibility offered can assist with expanding offices, multiple sites and growing businesses.

Our Hosted Telephony Solutions for Business can provide a true hosted service with full end to end support. Extensive range of capabilities via the online portal, full extension management and installation.

Benefits include:

- **Core network access using Qos enabled connectivity**
- **Free local and national calls**
- **Management portal**
- **Future proof**
- **Award winning Handsets and router provided**
